School: Benton Stearns Education Programs Grade: 11 DOB: 07/07/2001

1. An Explanation why the standards and procedures used with the majority of students resulted in invalid findings for this student.
2. What objective data were used to conclude that the student has a disability and is in need of special instruction and related services? (These data include, for example, test scores, work products, self-reports, teacher comments, medical data, previous testings, observational data, ecological evaluations, and other developmental data.)
3. Because the eligibility decision is based on a synthesis of multiple data and not all data are equally valid, the team must indicate which data had the greatest relative importance for the eligibility decision.
